

Project Profile

Project Definition	Online Mobile Shopping
Objectives	Our Main Objectives are provide various Functionality to the User For Executing all Transaction in Smooth User Friendly and Effective it also provide search the product Comparision of two product and many more Facility to the User.
Front-End Tools	ASP .NET with C# (.Net Framework 3.5)
Back-End Tools	Microsoft SQL Server 2008
Other Tools	Crystal Report 10.5 , MS office 2007 , Flash
Internal Guide	Mrs. Janki Patel
Submitted To	Department Of Software Developer, ITC, Gujarat
Time Duration	50 days
Developed By	Dev Soni

Existing System

- In the current system all work are done manually.
- Wastage of time to find out how many order are placed.
- In manual system generating reports for particular types of data based on some condition is time consuming task.
- Searching facility is not provided in a System.
- Time & Money is not save in a System.

Need for new system

- In the new system customer can purchase mobile online.
- Save time and money by online shopping.
- Customer can see the latest mobile.
- Give the Discount Offer For Customer.
- Member Ship Of Customer.

Features:

- Provide different type of searching facilities.
- Provide shipping method.
- Provide upcoming mobile news detail.
- Generate a different types of reports.
- Customer can manage profile.
- Online SMS and Email Send to the Customer.

Functional Specification

Modules Description

➤ User Management:-

In this module new customer register in our web site.

Allready register Customer can login in our web site.

Customer can update own profile.

➤ Mobile Management:-

Admin can manage mobile and easily add, update, delete the product.

Customer can select the product and view product.

➤ Order Management:-

Admin can manage the all order and view and confirm the all order.

Customer can give the order.

➤ Shopping Cart :-

Customer can view their selected mobile. And they can update or delete their products.

➤ Payment :-

Customer can pay their price through PayPal and cash on delivery.

➤ Feedback :-

Customer can give feedback.

➤ Report Generate:-

Generate different types of reports.

User with Specific Role

1) Admin :-

➤ Login :-

Admin can Login in our web site.

➤ Manage Mobile and mobile category :-

Admin can Manage all type mobile and mobile category.

➤ Manage Customer :-

Admin can manage customer and his/her Order.

➤ Manage Payment Detail :-

Admin can manage payment detail PayPal.

➤ Generate Report :-

Admin can generate the Different types of report.

2) Customer :-

- **Registration :-**
New Customer can registration in our web site.
- **View product and product category :-**
Customer can view the product and product category in our web site.
- **Search product :-**
Customer can search the various mobile.
- **Login :-**
Allready Registered Customer can login in our web site.
- **Add to Cart :-**
customer can selected multiple mobile through cart. And they can update or delete therir products.
- **Buy product :-**
Customer can purchase the mobile.
- **Feedback:-**
Customer can give the feed back.

3) Visitors :-

- **Search product :-**

Customer can search the various mobile.

- **View mobile category :-**

Customer can view the mobile and mobile category in our web site.

Hardware & Software Requirements (Minimum)

Software Requirement Minimum:-

<u>Server side Requirement:-</u>	
Operating System:-	Windows Server 2003
Web Server:-	IIS 6.0
Runtime environment	.Net Framework 3.5
Back-end Tool:-	Microsoft SQL Server 2005

<u>Client side Requirement:-</u>	
Operating System:-	Windows XP or Any equivalent OS
Web-Browser:-	Internet Explorer 6.0 or Any compatible Browser

Hardware Requirement Minimum:-

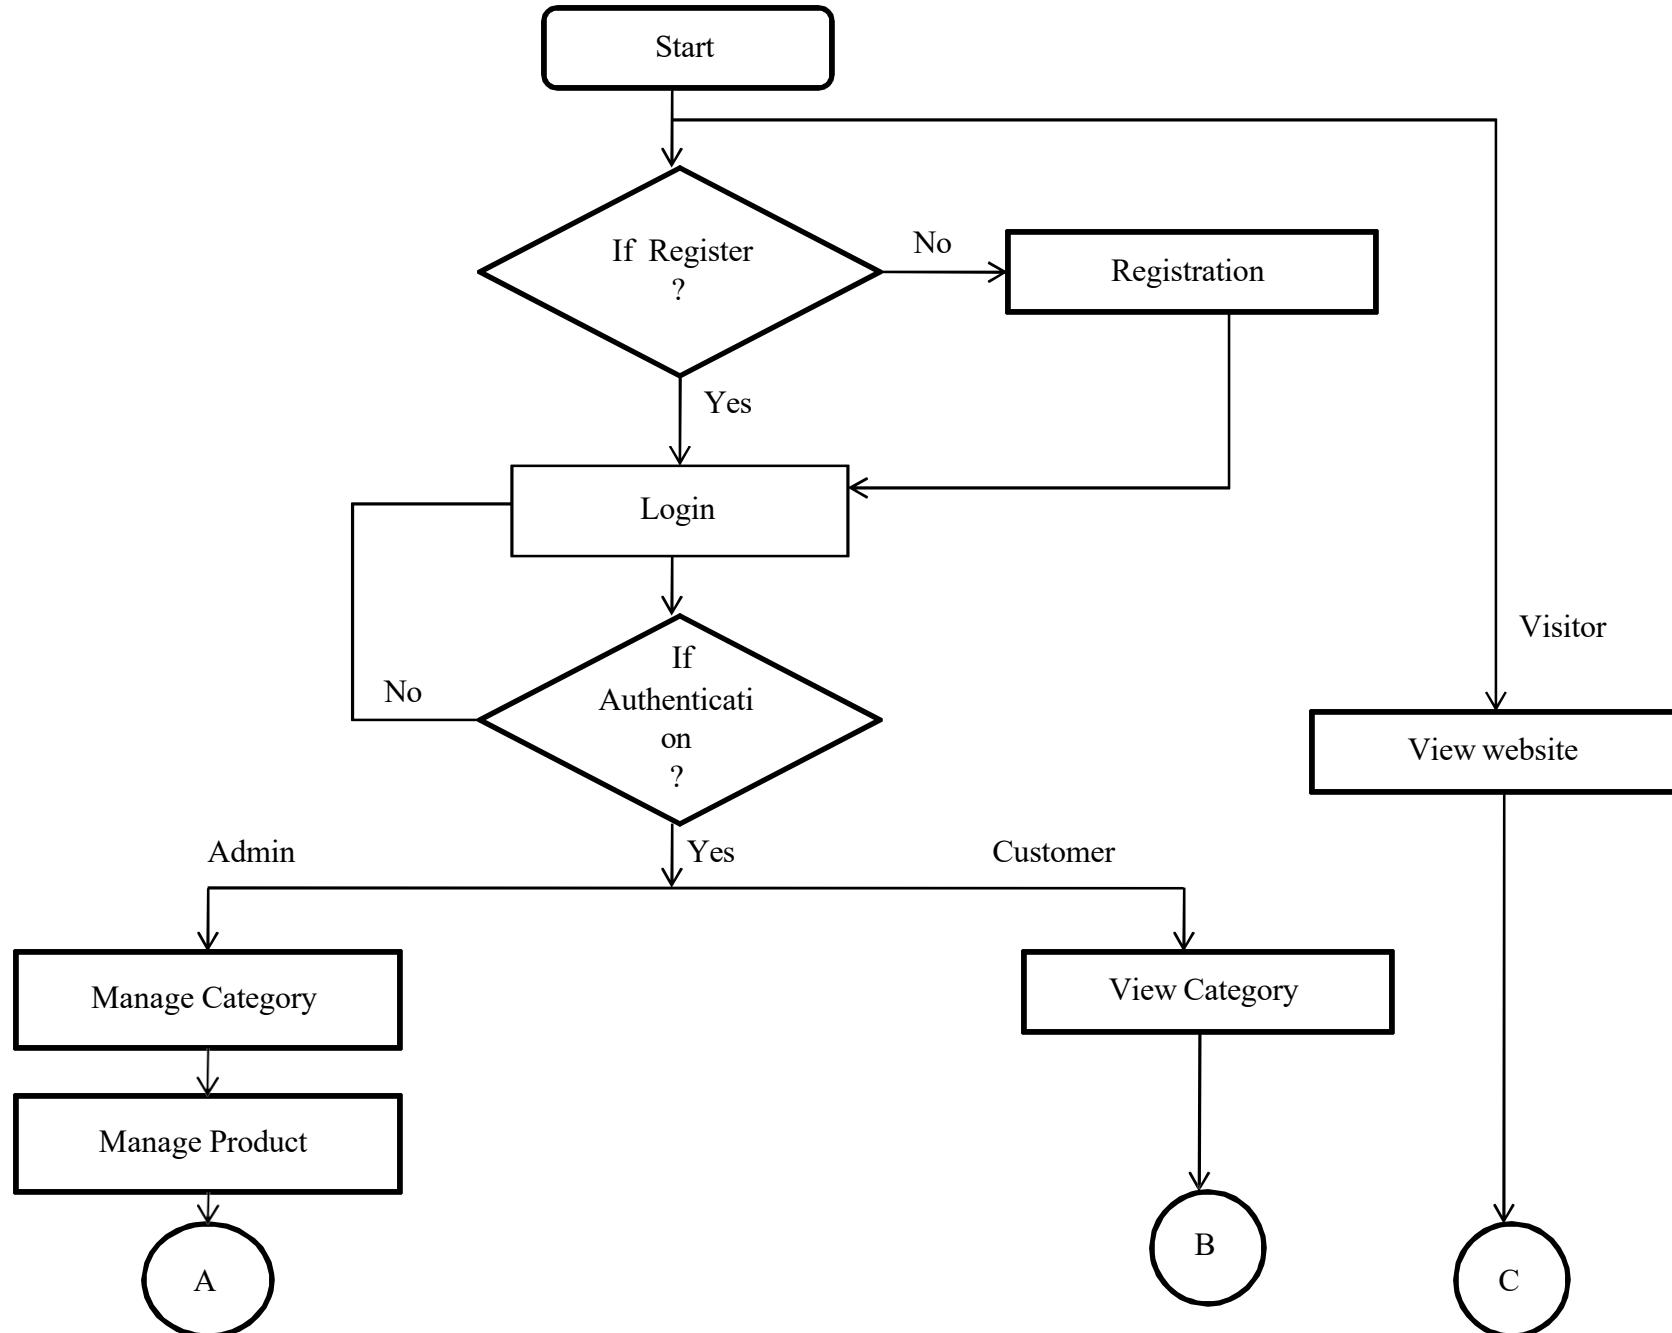

Server side Requirement:-

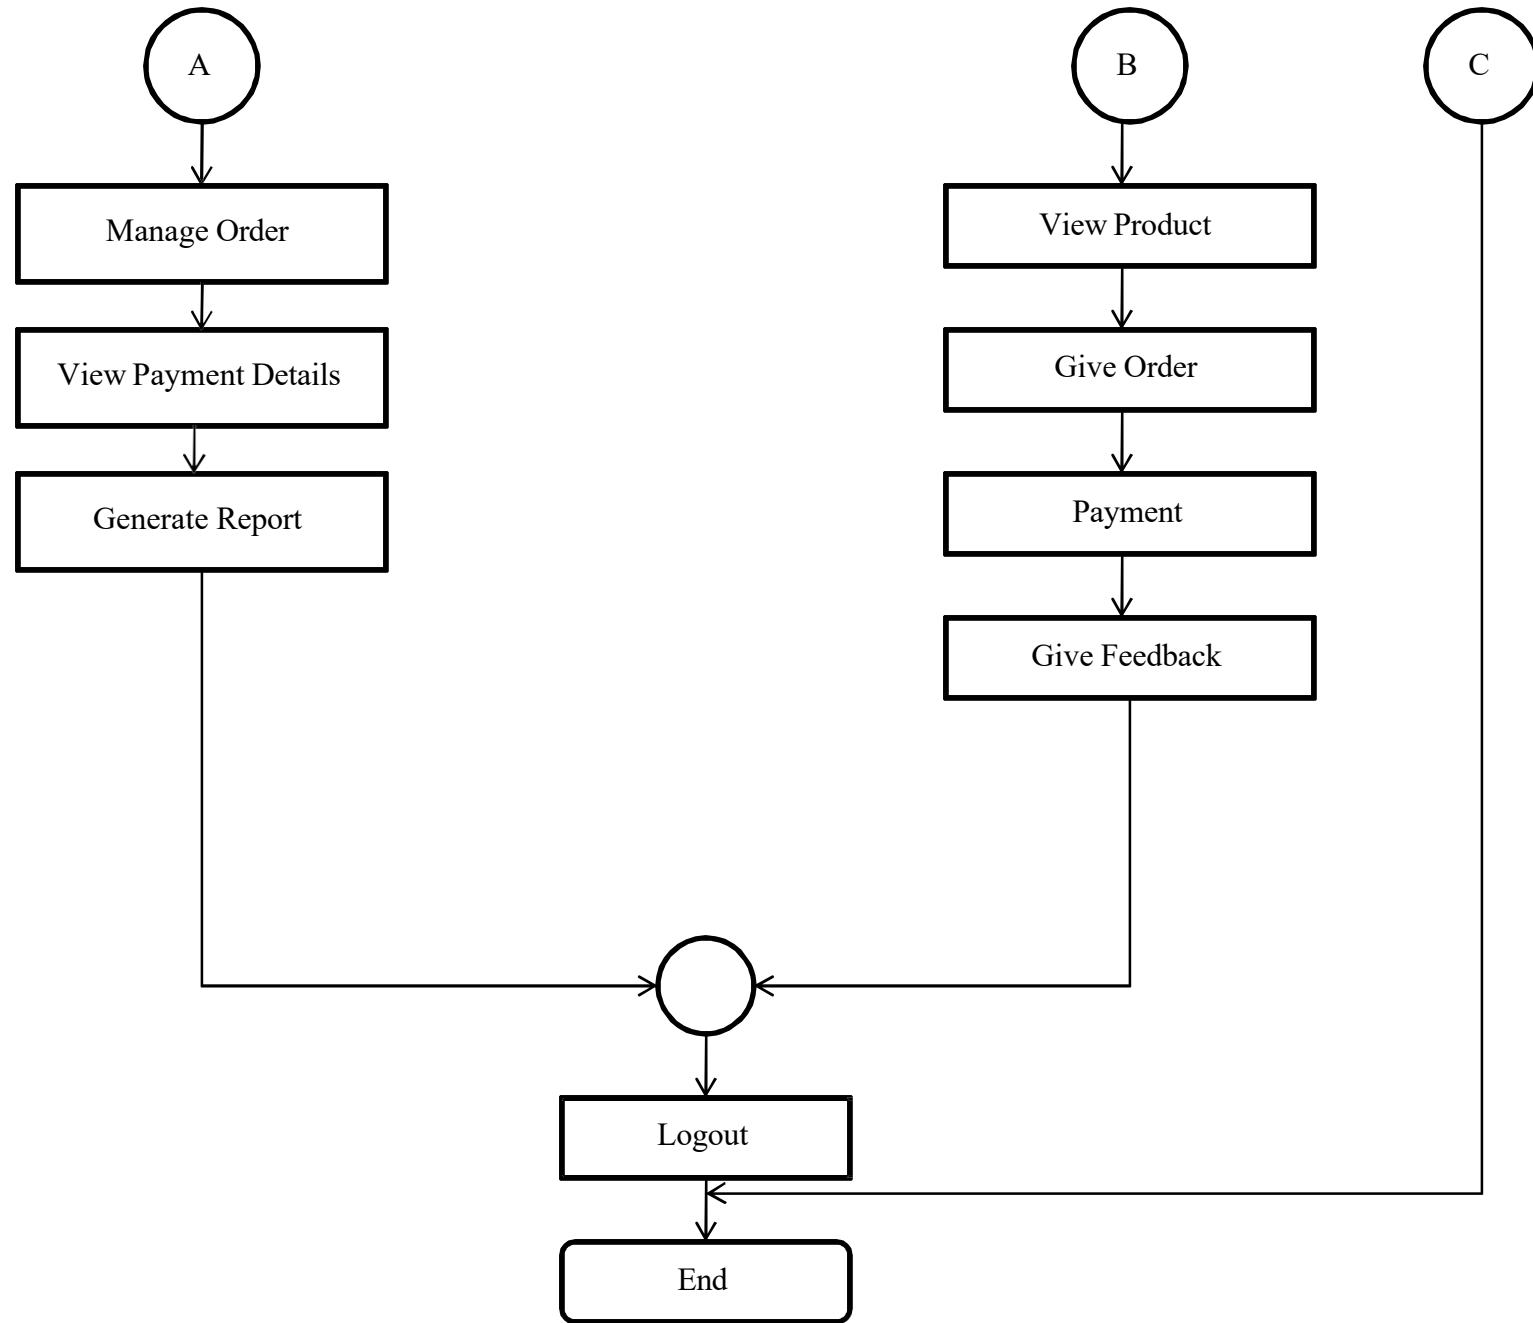

Processor: -	2.0 GHZ
RAM:-	1 GB
Hard disk:-	40 GB free space

Client side Requirement:-

Processor: -	2.0 GHZ
RAM:-	512 MB
Hard disk:-	20 GB free space

Description: In this page admin can Manage Order.

View Order Items

The screenshot shows a web browser window titled "View Order" displaying an online mobile shopping application. The URL in the address bar is "localhost:4736/Online Mobile Shopping/Admin_View_Order.aspx?name=bhavesh". The page features a header with the text "Online Shopping" and navigation links for Home, Profile, Manage All, Payment, View Feedback, Report, and Logout. On the left, there is a sidebar titled "Categories" listing brands: Apple, Samsung, Nokia, Sony, Htc, Micromax, and Gionne. The main content area is titled "View Order Here" and contains a table showing three order items:

Product Id	Product Name	Username	Quantity	Base Price	Total Price	Photo
51	iphone 5s gold	bhavesh	1	71000.00	71000.00	
67	Sony Xperia Z	bhavesh	1	30000.00	30000.00	
49	iphone 5c	bhavesh	1	35000.00	35000.00	

To the right of the table is a "What's new" section listing discounts and promotions:

- 5% Discount On Samsung Galaxy
- Alpha
15% Discount On Sony Xperia C
- 25% Discount On iphone 5S
- 10% Discount On Nokia Lumiya
- 720
50% Discount On Gionne Mobile

The bottom of the screen shows the Windows taskbar with icons for various applications and the system tray indicating the date and time as 9:57 AM on 11/16/2014.

- Description: This page contain the information regarding order.

View Payment Details

The screenshot shows a web browser window titled "Untitled Page" displaying the URL "localhost:4736/Online Mobile Shopping/Admin_Payment.aspx". The page has a header with a mobile phone icon and the text "Online Shopping". Below the header is a navigation menu with links: Home, Profile, Manage All, Payment, View Feedback, Report, and Logout. On the left, there is a sidebar titled "Categories" listing mobile brands: Apple, Samsung, Nokia, Sony, Htc, Micromax, and Gionne. The main content area is titled "Manage Payment Here" and contains a table with the following data:

	Pay_Id	C_Id	Payment Type
Edit Delete Select	1	26	Internet Banking
Edit Delete Select	2	28	Cash On Delivery
Edit Delete Select	3	26	Cash On Delivery

Description: In this report show the all Category information.

Testing(Test Cases)

Id	Scenario	Test Cases	Expected Result	Actual Result	Pass/Fail)
1	Registration	Enter null in mandatory fields.	It should not do the registration and show error.	It will show message that enter the data.	Pass
		Enter incorrect data	It should not do the registration and show error.	It will show message that enter the correct data.	Pass
		Enter correct data of all required field	It should let do registration..	It will show the message of successfully registration	Pass
2	Login	Enter null username or password.	It should not do the login n show error.	It will show message that enter username and password.	Pass
		Enter wrong data of username or password.	It should not do the login show error.	It will show message that enter correct username or password.	Pass
		Enter correct data of username or password.	It should let do login.	It will show the message of successfully login.	Pass

3	Category	Enter null in mandatory fields.	It will not add category	It will show message that enter the category name & description	Pass
		Enter correct data of all required field.	It should add the category	It will show the message that category add successfully	Pass
4	Product	Enter null in mandatory fields	It will not give permission to add the product	It will show the messages that enter the required details.	Pass
		Enter correct data of all required field.	It should add category	It will show the message that add category successfully.	Pass
5	Special Product	Enter null in mandatory fields	It will not give permission to add the special product	It will show the messages that enter the required details.	Pass
		Enter correct data of all required field.	It should add special product	It will show the message that add special product successfully.	Pass
6	Order	Enter null in mandatory fields	It will not give permission to give the order.	It will show the messages that enter the required details.	Pass
		Enter correct data of all required field.	It should give the order.	It will show the message that give order successfully.	pass

7	Search Product	Enter null in mandatory fields.	It will not search product.	It will show message that enter product name.	Pass
		Enter correct data of all required field.	It should search product	It will show the message that search product successfully	Pass
8	News	Enter null in mandatory fields	It will not add news.	It will show message that enter the add news.	Pass
		Enter correct data of all required field.	It should add news.	It will show the message that add news successfully	Pass
9	Validation Test case	Required Field Validation	Mandatory Fields should not be blank	You have to enter some value into mandatory field	Pass
		Range Validation	The field value must have the predefined range	Only 10 number are enter in the field	Pass
		Fixed format validation	A predefines format should be follow	Check the proper format of E-Mail Id	Pass
10	Unit Test	In unit test each form is tested separately. In this system each form is separately run under different condition and checked all validation.			
11	System Test	In system test the whole system is tested. The whole system works properly. The page navigation is proper and links are given properly.			

Post Implementation Review

- Improve the Performance of this website because at this time it will take time to load only First page in Web Browser.
- More Functionality to be add that make this website to more user Friendly.
- Post implementation review is conducted by Users and Analyst.
- To determine whether the system has met its objective, that is analysts, want to know if the performance level of Users has improved. If nothing is happening, one may question whether.
- The system can be considered successful.

Future Enhancement

- May be including Page Themes User Friendly.
- May be Including Page Animation to be Added.
- May be make this Website Attractive and Fill Up the User Requirements.
